

TITAN EXTREME DUTY TRUCKS

EXTREME MOBILITY – DRIVING WHERE OTHERS CAN'T

ROLLING OUT EXTREME MOBILITY ON A SUPERIOR OFF-ROAD CHASSIS

Titan Trucks introduces a proven, superior chassis built for mobility in rugged and extreme operating conditions, as well as best-in-class durability. Our chassis system is based on the FMTV, a family of tactical vehicles designed and manufactured by BAE Systems for the U.S. Army. With over 60,000 vehicles in active duty all over the world, the FMTV established new standards for mobility, reliability and capability in the Army's tactical vehicle fleet.

Leveraging the successful military legacy, Titan Trucks introduces a superior chassis to the severe/extreme duty global market. Now available on commercial 4x4 and 6x6 platforms, we've brought military toughness to civilian duty.

TRACKING TO VALUE: RELIABILITY, MOBILITY, DURABILITY AND SUPPORTABILITY

Unmatched in durability and mobility in extreme operating environments, Titan Trucks Extreme Duty Chassis provides a solid investment, exceptional capabilities and superior performance. The Chassis offers clear value and return on investment, over the life of the vehicle.

Reliability

Our flexible frame design adapts to severe terrain—avoiding those maintenance and repair issues when on-road vehicles are driven off-road. The Chassis has demonstrated its reliability in military vehicles by operating at greater than 95% availability rate, with over 400 million miles driven, averaging 15 years of service.

Mobility

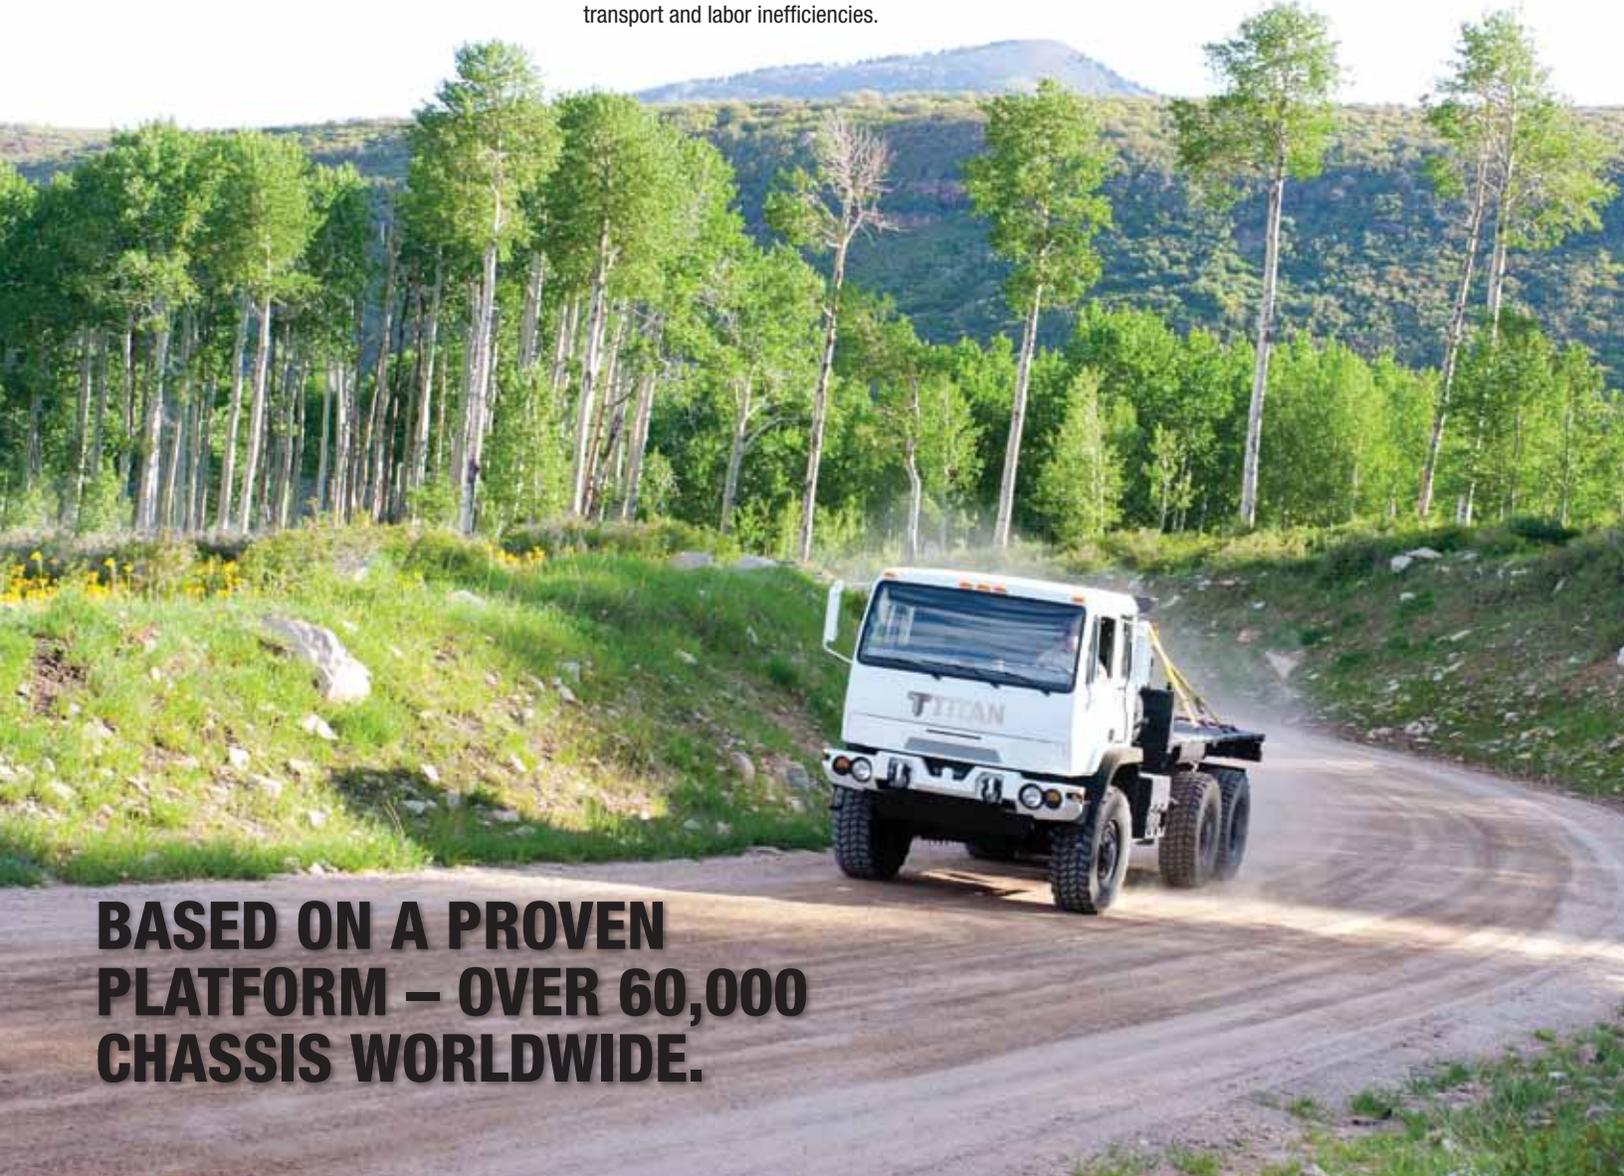

The Extreme Duty Chassis has superior ground clearance and slope-climbing capabilities, can ford through 30 inches of water and offers a Central Tire Inflation System (CTIS). Driving where other vehicles can't provides major savings in stuck vehicle retrieval costs, vehicle down time, additional transport and labor inefficiencies.

Durability

After five years of use in an extreme operating environment, an on-road vehicle may no longer be on the road. But our Extreme Duty Chassis is designed to last 20 years in an off-road/extreme environment, outlasting any other comparable vehicle and reducing lifecycle costs.

Supportability

With spares and services available around the globe, the Chassis integrates components from global brands including CAT®, Cummins®, Allison® and Meritor®.

A white Titan Extreme Duty Chassis truck is shown from a rear three-quarter view, driving on a dirt road that curves to the right. The truck is kicking up a cloud of dust behind it. The background features a dense forest of tall, thin trees, likely aspens, with a mountain range visible in the distance under a clear sky. The overall scene is bright and sunny.

ON THE ROAD TO SAFETY AND OPERATIONAL EXCELLENCE

Safety requires using the right vehicle to meet specific terrain requirements. Environmental safety options provide survivability, protecting on-the-job operators.

Safe Operation

The Chassis is designed and tested to safely operate on 30% side and 60% vertical slopes. The cab-over design provides excellent visibility, reducing potential injuries as well as liability and repairs.

Environmental Safety Options

Titan Trucks Extreme Duty Chassis is built for the most hostile environments—terrain as well as potential threats. Our vehicles can be supplied with armor-ready packages, armored packages and arctic packages. These packages can elevate operational safety to a level unmatched by on-road vehicles.

A SUPERIOR CHASSIS ACCELERATES SUPERIOR PERFORMANCE RIDING A LEGACY OF ADVANCED TECHNOLOGY AND SECURITY CAPABILITIES

Transportability

Although the Extreme Duty Chassis is designed to operate off-road, every job site can be reached. In fact, driving to the job site eliminates expensive transportation costs of vehicles that can't drive on-road.

Adaptability and Maintainability

The Extreme Duty Chassis easily adapts to any occupational need in its weight class. It can be set up to carry cranes, drilling rigs, welding rigs—even personnel—in any environment. The cab-over design also offers the advantage of easy access when maintenance is required.

Our businesses are built on real advantage and real performance, understanding customer needs and providing advanced products. Introducing the Extreme Duty Chassis to the commercial marketplace, Titan Trucks builds on the proven capabilities, engineering, production and manufacturing advantages tried by the U.S. military with over 60,000 vehicles in active duty today.

NO ROAD? NO PROBLEM.

Getting to the job site is never a problem with Titan Trucks Extreme Duty Chassis. Built for military toughness and proven in the most severe operating environments, the Extreme Duty Chassis drives positive ROI and bottom-line impact by:

- Reducing lifecycle costs
- Eliminating vehicle transport and retrieval costs
- Reducing downtime
- Improving job operation and labor efficiency

When it comes to extreme mobility, we are driving where others can't.

NO ROAD? NO PROBLEM.

WHAT DO YOU NEED IN A SEVERE/EXTREME DUTY CHASSIS?

From width, length and wheelbase to compliance, below are specs for the Extreme Duty Chassis.

Specifications	6x6 Platform	4x4 Platform
Width x Length (in.)	96 x Up to 349	96 x Up to 257
Wheelbase (in.)	161 – 216	153
Drive Type (continuous all-wheel)	6 X 6	4 X 4
GVW (lb.)	Up to 46,172	Up to 24,700
Curb Weight (lb.)	17,800	14,640
Payload (lb.)	Up to 20,000	Up to 10,000
Power (hp.)	Up to 330	Up to 325
Torque (lb.-ft.)	Up to 860	Up to 860
Central Tire Inflation System	Yes	Yes
Compliance	EPA 2010/FMVSS or equivalent	EPA 2010/FMVSS or equivalent

Note: Specifications may change with engine type and application.
